

**Bexar County  
Infrastructure Services  
Flood Control CIP Program**

**Project: CW1**

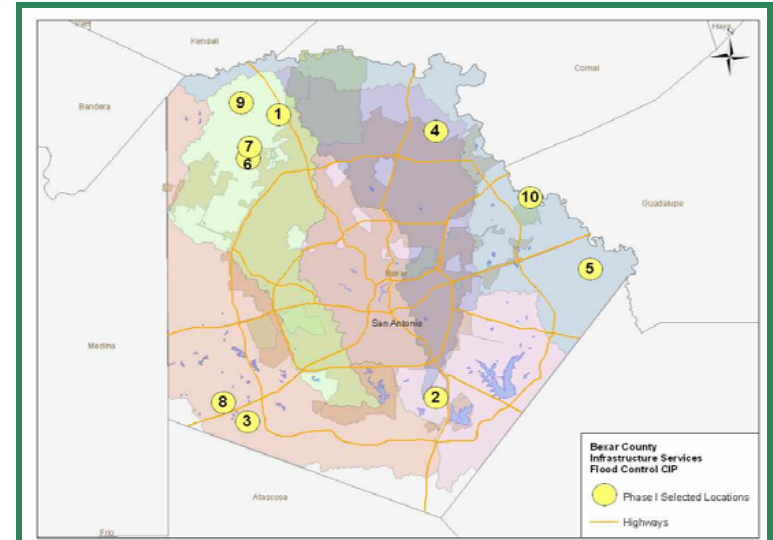

## High Water Detection System Phase I

**Location / Limits:** Locations listed below

### SCOPE :

Bexar County is proposing to expand its existing high water detection system throughout the unincorporated areas of Bexar County and provide secondary expansion of this system into incorporated areas in association with other local governmental agencies. The consultant will investigate and evaluate existing low water crossings identified by Bexar County Infrastructure Services Street and Drainage Division and make recommendations as to the priority of these systems.
